What do you hope to achieve today?

Get informed, updated, network

Sharing information with experts on data and peacekeeping

Information on data needs for peacekeeping

Learn about how OSINT can contribute to PKO

To be enlightened

To learn how other organizations contribute to PoC

Connecting with policy makers

More knowladge

Improved understanding of data collection policy at UN field and HQ level.

39

What do you hope to achieve today?

Learn something about the state of data modelling in the Peacekeeping field

Tips on open source data mining

Insights in how military use intelligence

Enhanced insight on the use of data in Peacekeeping with a special focus on protection of the population.

Exchange of knowledge on peacekeeping data

Learn on subject and interact, network with others.

I hope to learn more about how data is used in peacekeeping operations and how it may possibly be shared with other actors involved

Stay longer at the drinks than yesterday

Develop a common understanding about the opportunities

39

What do you hope to achieve today?

More information and opportunities

Input for NL position on this issues in int organisations (UN, NATO etc)

Learn about use of data, challenges and opportunities for policy makers

Improved data collection and sharing procedures and systems in Peacekeeping missions

Network & better understanding of the topic

Increased understanding of what others are doing related to data and peacekeeping

Better understanding of what partnership opportunities can be developed to make a more effective use of data in PKOs

Understand how we can leverage existing data, and work with others to improve evidence collection

Understanding of gaps in data for peacekeeping and options for improving. Networking. Stakeholder awareness (who's who). Link into the analysis process for decision makers.

39

What do you hope to achieve today?

Expand knowledge and network

To have more extensive knowledge on applying data and how open source data can contribute to operations

Identify potential for collaboration between military and civilian actors

Learn more on open data and their impact on peacekeeping - how they can be used in programme develJoIDent

Data sharing opportunities

Learn!

Learn more about data management

Which data are required to support decision-making process?

Deeper understanding of the relevance of data in peacekeeping and connected challenges. Impression of the cooperation network for peacekeeping.

39

What do you hope to achieve today?

Better understanding of how policy makers think about intel capacities in UN ops.
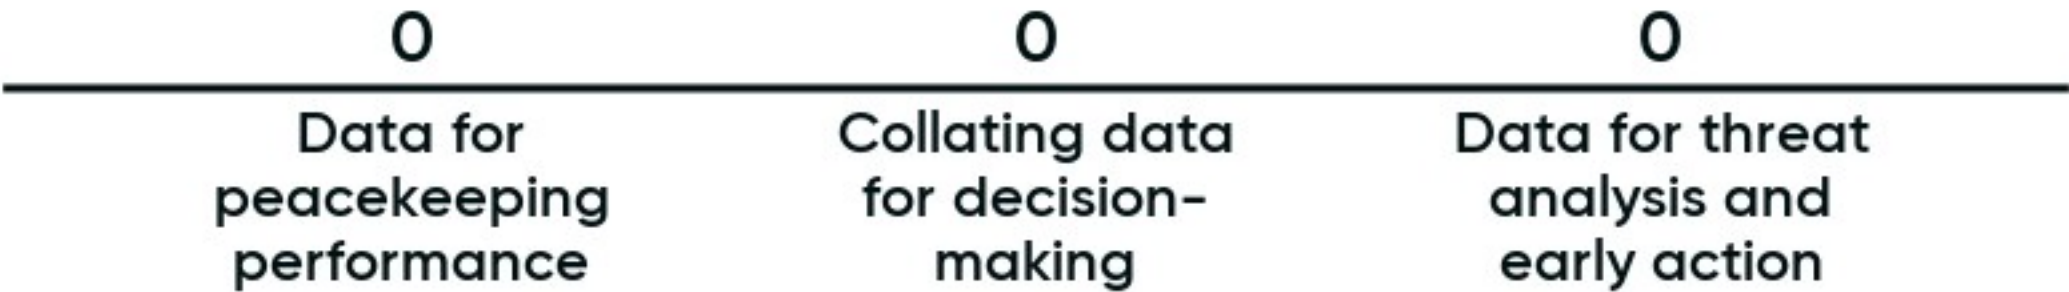

Meet like minded people

On one hand, to increase evyones understanding of how machine learning can aid UN peacekeeping early warning and data analysis. On the other to understand the challenges to UN missions.

39

What morning session do you plan to attend?

PAX
Peace.
Are
you in?

Evaluation

Describe your experience today in one word or a short phrase

Which was your favorite session?

Open data	All the sessions with Werner	Lunch
Drinking session.	Keynote address	Human intel
Open source	Keynotes	OSINT! <3

52

Which was your favorite session?

Human intelligence	Open source data	Open data
Open source intelligence	Data management system	Keynote
Christina	Keynotes	HumInt

👤 52

Which was your favorite session?

Lunch	Key note	Threat analysis and EW
Early warning	Christina's presentation	Open source data
Networking	Open source data	Collating data

52

Which was your favorite session?

Open source data	Open Source Intel	Pko performance
Open source data	Human Intelligence for Peacekeeping	All
Human intelligence and decision making	Open source	Human intel

52

Which was your favorite session?

Bellingcat and Airwars.	Christina's remarks at the start	Open source data
Keynote	Data for Pk performance	Human intel
Early warning	Mine	Hans!

👤 52

Which was your favorite session?

Collating data for decision making	Human intel	Keynote by marco
Tony and Luke	No	Mission decision makers
Biggest TCCs or PCCs		

52

Were any key people or perspectives missing?

Me	No	HDX
CPAS team at DPKO	Elvis	Political views
Hdx	The SG	Various Member States

42

Were any key people or perspectives missing?

PAX Peace. Are you in?

No	EU	Business perspective
Russians	Funding agencies	JMAC analysts from UN peacekeeping missions
UN ocha	#Watson	P5 perspectives

42

Were any key people or perspectives missing?

Trump

Top T/PCCs

DPKO USG

Chinese & Russian perspectives on data for peacekeeping

The classic academics

In some sessions: UN PKO staff

No

Perspective of OHCHR

Dos Santos Cruz

42

Were any key people or perspectives missing?

PAX Peace. Are you in?

JMAC

Representatives from other Peacekeepnig Mission

More military personell with mission experience

Policy makers from member states

Internal Analyst from the UN or NATO

P5

My wife

Civilian intel

Representatives from peacekeeping host countries

42

Were any key people or perspectives missing?

JMAC

CSOs

More variety of civilian mission personnel. Missions are integrated but viewed as military

SG
