IFICANT CHANGES NEEDED TO ACE TO SOUTH SUDAN?

Human Security Survey South Sudan

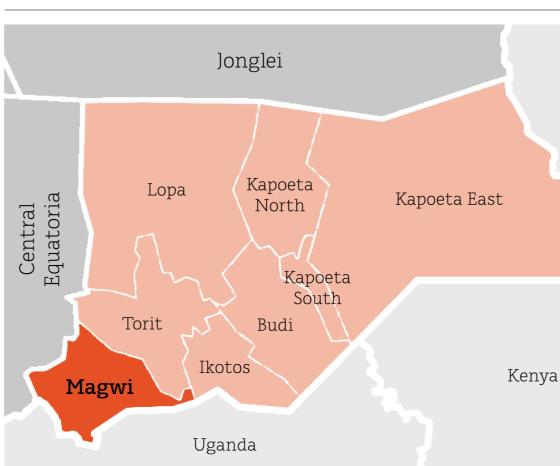

Eastern Equatoria State — April 2021

The **HUMAN SECURITY SURVEY (HSS)** is a methodology developed by PAX to collect data and facilitate dialogue about civilians' experiences and perceptions in situations of conflict. The purpose is to increase the understanding of local security dynamics and trends; enhance the 'claim-making capacity' of civilians to identify their priorities and hold security providers and decision-makers accountable; and enable international stakeholders to design and implement protection activities that reflect local priorities and experiences using evidence-based advocacy.

MAP OF SOUTH SUDAN — EASTERN EQUATORIA STATE

Disclaimer: These maps are intended for illustrative purposes only and do not warrant accuracy or completeness. Nor does it imply the expression of any opinion whatsoever on the part of PAX.

MAP OF EASTERN EQUATORIA STATE – MAGWI COUNTY

Over the span of 3 weeks, **12** enumerators conducted **393** face-to-face interviews in Eastern Equatoria State using a standardized survey instrument and script. One selection criterium of enumerators was English proficiency, as they were responsible for forward-backward translation of the English questionnaire to the local language during the interviews. Other criteria related to the diversity of the team, as well as technical and ethical competencies. Additionally, in response to the **COVID-19 pandemic**, several measures were taken to minimize the risk of infection during the enumerator training and data collection, such as the use of face masks, regular hand disinfection, no hand shaking, and maintaining 2 meters distance at all times.

reinstituted in South Sudan, in which Eastern Equatoria State consists of 8 counties. The enumerators surveyed 6 payams in Magwi County (Iwire, Magwi, Mugali, Nimule, Pageri, Pajok). These areas were selected in cooperation with local partner Justice and Peace Commission – Catholic Diocese of Torit (JPC-CDoT) and the enumerators on the basis of physical security and geographical access. Within the payams, households and individual respondents were selected using an approximately random procedure to allow for some generalizability of the HSS results. PAX will return to Eastern Equatoria for a data presentation and community dialogue meeting to formulate an action plan to improve the local security situation.

In February 2020, the ten states system of governance was

Respondents finding it important for civilians to meet with local government and organized forces to advocate for better protection in their community
