HUMAN SECURITY SURVEY METHODOLOGY

During 3 weeks in February 2022, **14** enumerators conducted **437** face-to-face interviews across 3 counties of Jonglei State using a standardized survey script. For more details on how HSS data is collected and analyzed, view our [methodological note](#).

PAX will return to Jonglei for a data presentation and **community dialogue meeting** to formulate an action plan to improve the local security situation.

PAX will continue to monitor the local security dynamics in Jonglei through the [Expert Panel Monitor](#) until the HSS returns for another data collection round in 2023.

Left: Map of South Sudan. Right: Map of Jonglei State, highlighting the counties surveyed in 2022. Disclaimer: These maps are intended for illustrative purposes only and do not warrant accuracy or completeness, nor do they imply the expression of any opinion by PAX.

79% Find it important for civilians to meet with local government and organized forces to advocate for better protection in their community

The **Human Security Survey** (HSS) is a methodology developed by PAX to collect data and facilitate dialogue about civilians' experiences in conflict situations.
